

CARDIOMETABOLIC LECTURE SERIES

Guideline Directed Medical Therapy for Heart Failure & The Kidney

MUTHIAH VADUGANATHAN, MD, MPH

Co-Director, Center for Cardiometabolic Implementation Science
Brigham and Women's Hospital
Division of Cardiovascular Medicine
Harvard Medical School

Dr. Vaduganathan received his medical degree from Northwestern University, where he also obtained a master's degree of public health. He completed residency training at Massachusetts General Hospital and fellowship training in cardiovascular medicine at Brigham and Women's Hospital. His research is centered on drug development, clinical trials, and the implementation of cardio-renal-metabolic therapies.

Dr. Vaduganathan has authored or co-authored over 650 peer-reviewed publications and is involved in the leadership of ongoing advanced-phase trials in cardiometabolic medicine and heart failure.
